ABOUT:

I am a seasoned full-stack web developer with a passion for responsive web design and single-page application development. My current focus includes working with Nuxt.js & Vue.js frameworks and implementing serverless solutions on Google Cloud Platform. I excel in building and supporting applications from the ground up for Software as a Service (SaaS) business models and multi-user environments.

Notable achievements include leading the development of high-traffic SaaS applications that improved clients' quality of life and user engagement. I thrive in collaborative environments and possess strong problem-solving and communication skills. I'm always seeking opportunities that challenge my current skill set and offer long-term growth potential, driven by a deep passion for technology and continuous learning.

SKILLS:

Front-end

- Nuxt.js Framework
- Tailwind CSS
- Vuetify & Nuxt UI

Backend

- Node.js, Express.js
- Firebase, Cloud Functions
- Linux, Apache, MySQL, PHP

Tools

- Visual Studio Code
- Git Version-Control
- JIRA Project Management

EXPERIENCE:

2/19 – Present

PlacerTech, New York, NY
Software Developer

Responsible for full-stack development and maintenance of proprietary cross-platform SaaS applications. Engaged directly with clients to provide support and gather feedback for continuous improvement. Mentored junior software developers, fostering their growth and enhancing team capabilities.

1/17 – 2/19

Wrecking Ball Studio + Labs, Fort Lauderdale, FL
Software Engineer

Build and maintain front-end interfaces and RESTful APIs for multiple products. Collaborate with team members to build high-performance, reusable, and modular code.

6/16 – 1/17

Envisia Group, Hollywood, FL
Front-End Developer

Build and maintain responsive e-commerce websites utilizing Bootstrap framework, jQuery and Vanilla JS. Integrate PHP-based proprietary cart and analytics platform across various projects.

5/16 – 6/16

Nobox, Miami, FL
Web Developer Intern

Work alongside developers assisting with landing campaign pages for clients. Fix issues regarding website performance, content, visualization and functionality.
