WEBSITE: JONMALAVE.COM

ABOUT:

I am a seasoned full-stack web developer with a passion for responsive web design and single-page application development. Currently, my focus includes working with Nuxt.js and implementing serverless solutions on Google Cloud Platform. I excel in building and supporting applications from the ground up for Software as a Service (SaaS) business models and multi-user environments. I am always seeking new opportunities that challenge my current skill set and offer long-term growth potential.

EXPERIENCE:

2/19 – Present

PlacerTech, New York, NY
Software Developer

Responsible for full-stack development and maintenance of proprietary cross-platform SaaS applications. Working with Google Cloud Platform serverless solutions, Node.js, Nuxt (Vue.js Framework) and Material Design principles.

1/17 – 2/19

Wrecking Ball Studio + Labs, Fort Lauderdale, FL
Software Engineer

Build and maintain front-end interfaces and RESTful APIs for multiple products. Collaborate with team members to build high-performance, reusable, and modular code.

6/16 – 1/17

Envisia Group, Hollywood, FL
Front-End Developer

Build and maintain responsive e-commerce websites utilizing Bootstrap framework, jQuery and Vanilla JS. Integrate PHP-based proprietary cart and analytics platform across various projects.

5/16 – 6/16

Nobox, Miami, FL
Web Developer Intern

Work alongside developers assisting with landing campaign pages for clients. Fix issues regarding website performance, content, visualization and functionality.

EDUCATION:

1/16 – 3/16

Codecademy
JavaScript Fundamentals, jQuery, and intro to Object-oriented Programming
