ABOUT:

I am a seasoned full-stack web developer with a passion for responsive web design and single-page application development. My current focus includes working with Nuxt.js & Vue.js frameworks and implementing serverless solutions on Google Cloud Platform. I excel in building and supporting applications from the ground up for Software as a Service (SaaS) business models and multi-user environments. Notable achievements include leading the development of high-traffic SaaS applications that improved clients' quality of life and user engagement. I thrive in collaborative environments and possess strong problem-solving & communication skills. I'm always seeking opportunities that challenge my skill set and offer long-term growth potential, driven by a deep passion for technology and continuous learning.

SKILLS:

Front-end	Backend	Tools
• Nuxt.js Framework	• Node.js, Express.js	• Visual Studio Code
• Tailwind CSS	• Firebase, Cloud Functions	• Git Version-Control
• Vuetify & Nuxt UI	• Linux, Apache, MySQL, PHP	• JIRA Project Management

EXPERIENCE:

2/19 – Present

PlacerTech, New York, NY
Software Developer

Responsible for full-stack development and maintenance of proprietary cross-platform SaaS applications. Working with Google Cloud Platform serverless solutions, Node.js, Nuxt.js (Vue.js Framework) and Material Design principles.

1/17 – 2/19

Wrecking Ball Studio + Labs, Fort Lauderdale, FL
Software Engineer
